Association Européenne des Concessionnaires
d'Autoroutes et d'Ouvrages à Péage

TWO DIFFERENT WORLDS MEET ...

European GNSS world

EC/GSA

Galileo/Egnos

**Potential applications
are everywhere**

ASECAP world

Toll road infrastructure
operators

Daily management of
their networks

**Based on existing
realities**

TOWARDS A ROADMAP FOR EUROPEAN GNSS APPLICATIONS FOR TOLLING

- **Memorandum of Understanding** on cooperation between ASECAP and the GSA, signed in April 2012
- To remember:
 - Common goal: to provide a **high-quality road service** to the end-user at an appropriate cost
 - First objective: to work **towards a realistic, deployment-oriented roadmap** for possible European GNSS applications for tolling
 - *Starting point: examine applicable (market) conditions*
 - *Expectation: sound mutual understanding*

5 INITIAL ACTIONS

1. Identification of GNSS-DSRC **coexistence** and **interoperability** issues
2. Analysis of the **strengths and weaknesses** of GNSS for tolling
3. Monitoring and assessment of the legal framework, R&D/projects and other RUC **developments**
4. Optimisation of cross-border / multi-ETC **enforcement**
5. Assessment of the **potential** of new applications and new markets

Thank you for your attention
