Organized by

Rights and Obligations of the Key EETS Stakeholders in the Draft Revised EETS Directive

Users and Toll Chargers

Articles 4b and 4f

EETS Providers

Article 4c

Rights and Obligations of Users and Toll Chargers in the Draft Revised EETS Directive

Users

Have the **obligations** to...

- Pay tolls
- Provide data
- Use correctly the OBU

Have the **right** to...

- Subscribe to EETS with the provider and in the country of their choice
- Have their data protected

Toll Chargers

Have the **obligations** to...

- Ensure interoperability of the Toll System
- Develop and maintain a toll domain statement
- Allow accreditation of interested EETS Providers on non-discriminatory basis

Have the **right** to...

- Receive tolls
- Control EETS Providers for accuracy of toll data
- Prosecute toll offenders
- Deduct their costs to run and maintain an EETS compliant system from the remuneration of the EETS Provider

Obligations of EETS Provider are well defined but their rights need to be explicit and unconditional

EETS Providers

Have the **obligations** to...

- Register in at least 4 Member States within 36 months of registration and maintain coverage at all times
- Provide Users with fit for purpose OBUs
- Provide Toll Chargers with the data needed to calculate and verify the tolls applied to Users
- Issue Correct Invoices to EETS Users
- Cooperate with Toll Chargers on identifying toll offenders
- Inform Users of detected toll non-declaration situations
- Hold ISO certification, demonstrate competence across multiple toll domains, have appropriate financial standing

Need to have the **right** to...

- Adequate remuneration for their services
- Non-discrimination
- Fair competition
- Equal treatment with national service providers
