Organized by

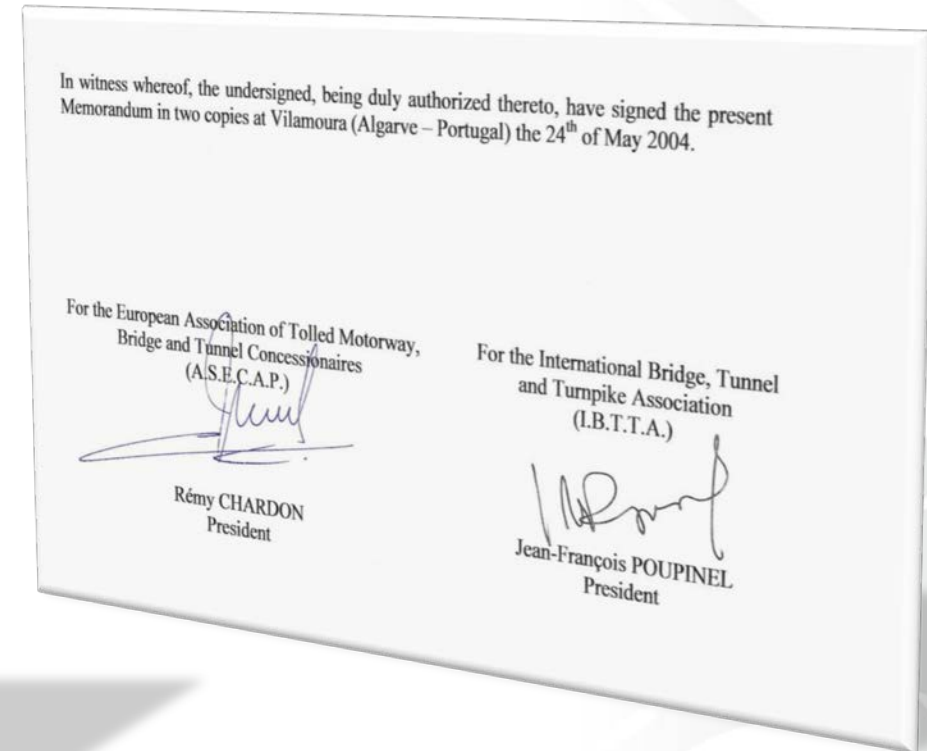

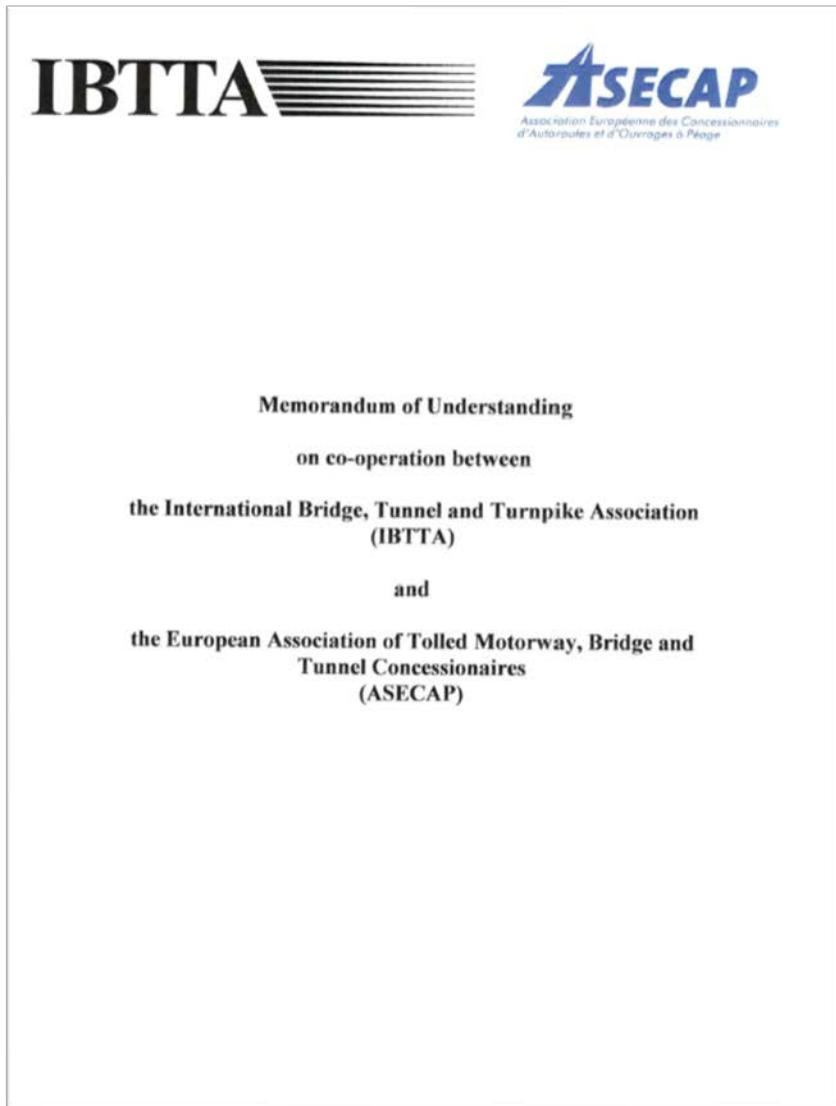

# EU mobility package: a decarbonized future

- The role of smart road sector and the connection with the smart cars
- Proper managed applying “**user pays and polluter pays**” principles (*Eurovignette, EETS, Safety, ITS, etc.*)
- A complex process in preparing law:
  - EC: 28 DGs (*Key : MOVE/GROW/CLIMA/CNCT/Research*)
  - Council: 28 states
  - EP: 750 MEPS
- Every draft is re-drafted many times: Lobbying in BXL is an long term art based on trust and risk
- Every position paper drafting today...tomorrow belongs to the past

EU Trilogy

# ASECAP and IBTTA : *MoU since 2004*

# ASECAP and IBTTA

## Developing transport synergies

**IBTTA**  
TOLLING. MOVING SMARTER.

**ASECAP**  
*Association Européenne des Concessionnaires  
d'Autoroutes et d'Ouvrages à Péage*

# Corner stones of ASECAP-IBTTA MoU

## Common Understanding

*Desiring to promote tolling systems as the best instrument for financing the construction, operation and maintenance of road infrastructures*

*Acting with the common objective of road transport integration, co- coordination and development*

*Desiring to offer to the customer the highest quality of road services at a fair cost*

*With the view to increasing their efficiency through the exchange of knowledge and experience*

# From Common understanding to coordinated actions by IBTTA in US and ASECAP in Europe

## European Union

- A complex political reality with many powerful competing Institutions
- Technical considerations are practically easy to be identified... but hard to be “sold” to the 28 member-states and 750 MEPs due to their diversities
- ASECAP members work hard internally - inside the ASECAP proper structures- under the President and the Secretary General to identify common positions in: Tolling / ITS / Safety / Data gathering
- ASECAP is in daily contact with the key BXL Institutions, Stakeholders and Personalities Respecting the above complex rules of Policy Making Game in EU

**Policy making is different in US and EU so...**

**...coordination is the TARGET**
