IBTTA
TOLLING. MOVING SMARTER.

A JOINT TOLLING DECLARATION

Preamble

Tolling is one of the most powerful and effective tools to finance, build, maintain, and improve road infrastructure for the benefit of road users and citizens.

ASECAP, the European Association of Operators of Toll Road Infrastructures and IBTTA, the worldwide Association for the owners and operators of toll facilities and the businesses that serve tolling, strongly believe in the positive effects of using tolls to support road infrastructure in all the countries they represent around the world.

ASECAP and IBTTA think that a wider application of tolling policies, based on the user pays principle, will be highly beneficial for governments - especially those that face severe economic pressure and may not have enough funds either to support new infrastructure or improve existing ones - and the users, who can immediately see the benefits they receive for the fees they pay on the road infrastructure they use.

Based on these beliefs and our strong commitment to implement our Memorandum of Understanding and Cooperation, we are proud to present this joint Tolling Declaration and to demonstrate the reasons why tolling supports mobility and economic growth in North America and in Europe, as well as in other regions of the world.

2013

A JOINT TOLLING DECLARATION

Preamble

Tolling is one of the most powerful and effective tools to finance, build, maintain, and improve road infrastructure for the benefit of road users and citizens.

DRIVING THE FUTURE OF MOBILITY
