# Increase in investment costs

- The effects of cost increases
  - Reduction of possible subsidies from the state budget
    - EU funds – an important part of project implementation
      - Ranking first in the use of EU funds within Slovakia

# Importance of EU grants

- More than 70 projects financed from EU funds
  - Construction - 40 projects
  - Project documentation - 30 projects
    - In total – 3,2 billion received
      - Cohesion Fund
      - Structural Fund
      - Connecting Europe Facility (CEF)
- Without the use of European funds, the implementation of many projects would not be possible, or would be postponed to a later period.
