About Autopay

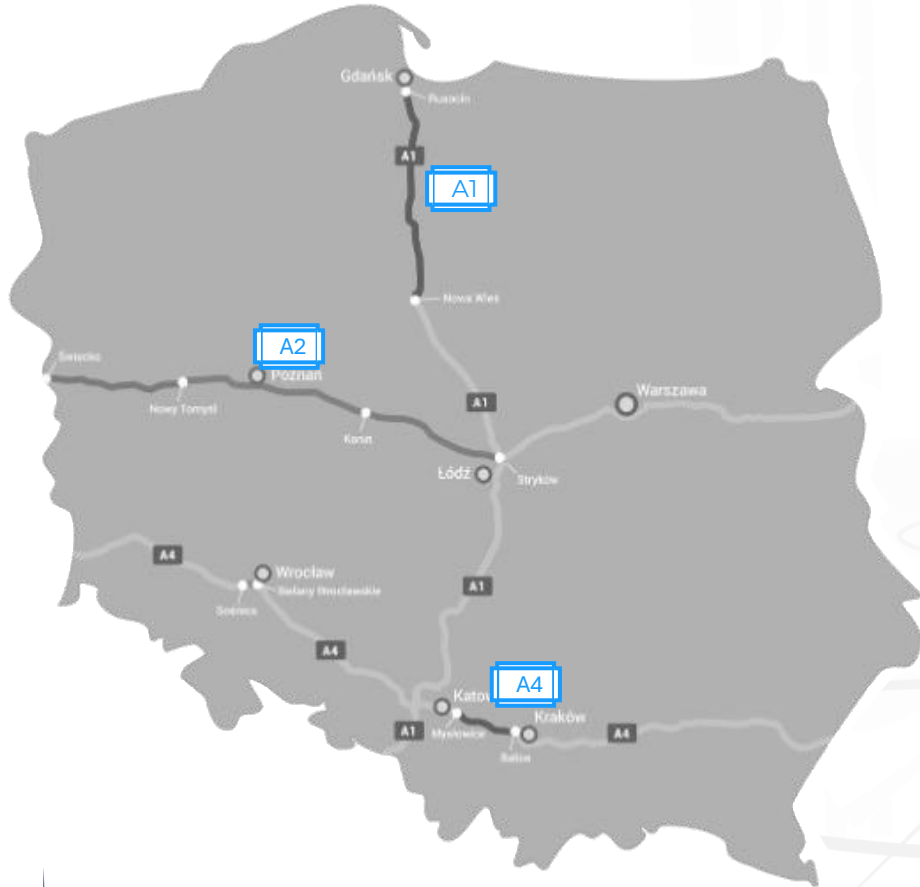

Autopay Mobility supports mobility ecosystem by overall **seamless, time-saving and eco-responsible payment solution.**

We offer a comprehensive **mobile and web platform** designed to facilitate automatic payments for a variety of mobility services including **tolling, vignettes and fuelling** at Polish and German market.

We are part of **Autopay group** which has been a significant player in Poland's financial sector **for over 20 years.** Specializing in payment services, the group caters to a diverse clientele, including banks and the e-commerce sector, establishing itself as **one of the major financial institutions in Poland.**

The problem – different tolling systems for LV

MANUAL PAYMENTS

- Open system
- Closed system

PRE-PAID TICKETS

- Free-flow system

VIDEOTOLLING

- Open system
- Closed system

Different operators

5

Invoice issuers

3

Payment schemes

2

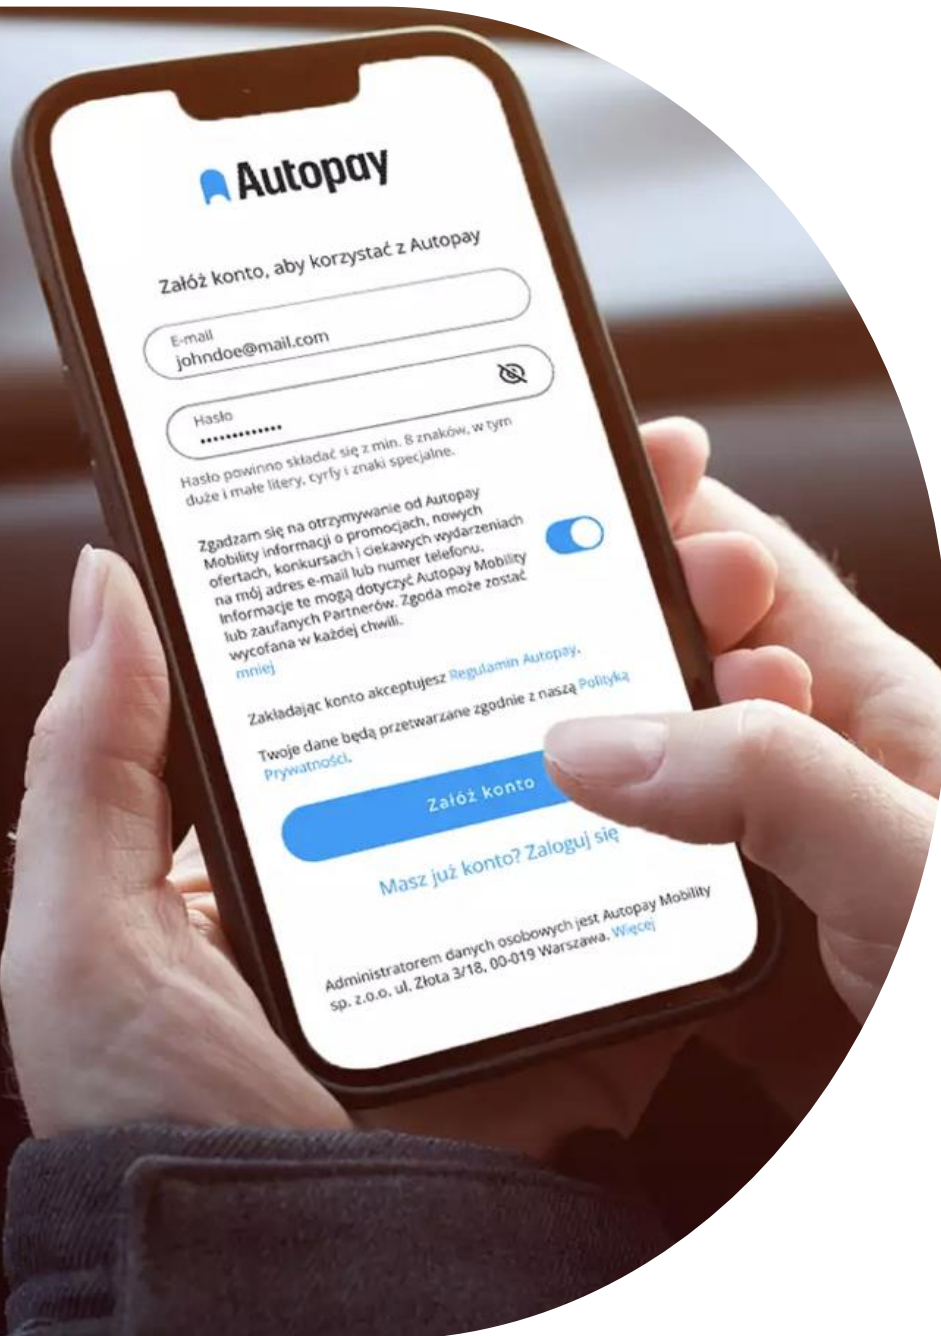

Systems (closed and open)

The solution

One App to cover all the systems

1. Create an account by entering car details (**license plate number**) and **assigning payment method** (payment card, direct debit, PayPal)
2. Enter one of Autopay point of acceptances
3. Vehicle recognition by:

ALPR cameras
Geofencing technology

The transition from pre-paid ticket to location - based cashless tolling solution

← Details of the route

Entry - start point*

Konin Wschód

Exit - end point*

Stryków

Expiry date from*

03.01.2022

Time*

12:42

Motorway ticket price

9,90 PLN

Ticket validity until: 05.01.2022 12:42

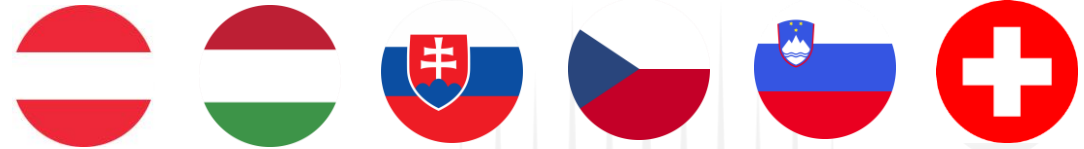

Summary

The free-flow system introduced in Poland on public motorways required the driver to **purchase a motorway ticket before the planned journey** and to enter a **number of details for the purpose of purchasing the ticket** (entry, exit, vehicle details, date of entry).

Thanks to the use of **geofencing technology** and the placement of virtual gates at motorway entry and exit points enabling Autopay to verify the route taken by the user, payment of the motorway **toll by Autopay is made without the need to purchase a pre-paid ticket manually**, the customer is **charged automatically** with the appropriate amount after the journey is made.

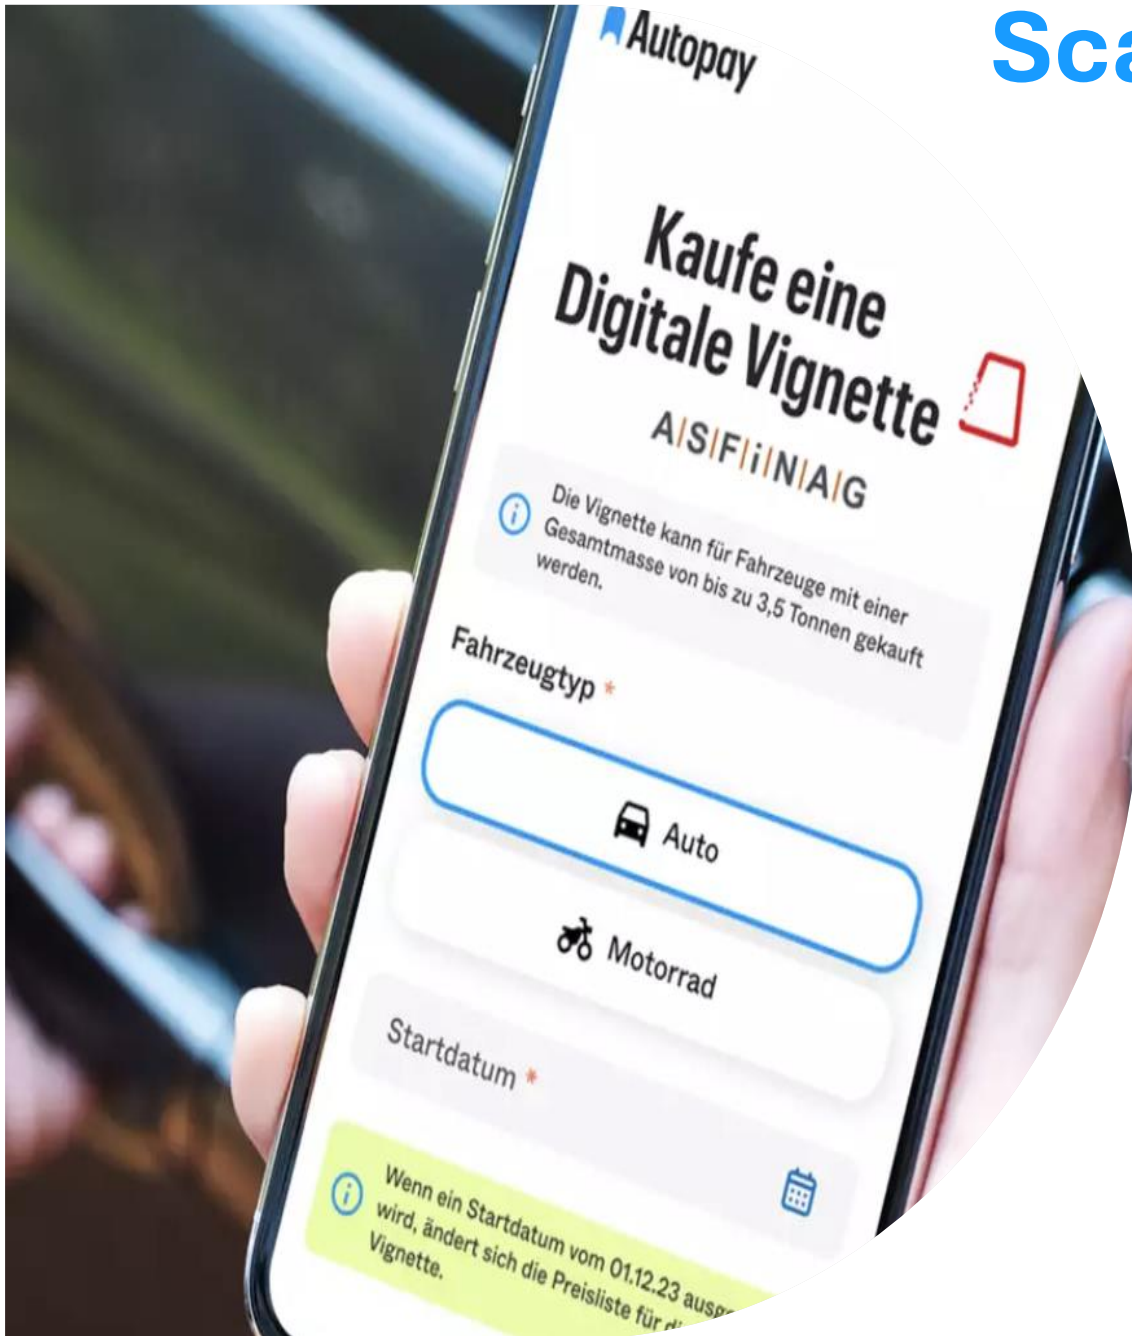

Scalability to time-based road charging

The Autopay system possesses **the flexibility** to effectively facilitate payments in markets governed by the vignette system.

Autopay **holds certification from ASFINAG** as a distributor of Austrian vignettes and digital section tolls.

The functionality to purchase vignettes is accessible via both the **Autopay application and the website.**

Select your access channel

Autopay mobile app:

A solution dedicated to individual and business customers enabling them to actively use Autopay services, manage their vehicles, view transaction statuses, use dedicated promotions

Autopay webshop:

Marketplace Autopay, which allows the purchase of one-off Autopay products (vignettes) also available for German customers at market.autopay.de

Partners' mobile app:

Autopay provides access to services on third-party partners' mobile services, e.g. banks' mobile apps.
