A massive action to diffuse the culture of road safety in Italy

Roberto Arditi – SINA/ASTM Group

Overview

2023: common objectives stated by SINA and the National Police

- According to statistics, road accidents are the key cause of death among young people.
- According to Italian statistics, the peak of road traffic victims is recorded in the age group between 18 and 24 years old.
- Promoters of Autostradafacendo and the Traffic Police decided to reach out to young people by devising a project aimed at promoting road safety culture.
- The main goal is to spread road safety culture directly to students and young adults, but it is also the opportunity to inform and mobilize other stakeholders.
- In the period when road risks involve young people as pedestrians, cyclists and future drivers, it is crucial to inform them about dangers and to train them about the responsibilities they will assume when they are active road users.

THE NEW PROJECT

PROMOTERS

The ASTM Group, of which SINA is the engineering company, is a global player in the management of **freeway networks under concession**, the design and construction of **major infrastructure works**, and **technology** applied to mobility.

In the concession sector, the ASTM Group is the **world second highway operator** with a managed network of about **6,200 km**.

ASTM wants to be a key player in the **digital and ecological transformation** of mobility, to build the infrastructure of tomorrow: innovative, resilient, sustainable and safe.

BREBEMI (Aleatica group) is also a key partner of «Andiamo sul sicuro» campaign

Road operators and traffic Police officers are road safety experts

We want to promote road safety in cities served by motorways operated by partners

It not an easy set of training meetings in schools. The project has an integrated design to speak to different ages and aims to flow a wide range of people in a long/medium term engagement for road safety matters. We are involving hundreds of different stakeholder, hundreds of staff member, hundreds of teachers and classrooms, thousands of students.

Oulook of the project on the public side

A commitment in four phases:

- Open air meeting days, normally in beautiful Italian squares
- Debates and movies for young adults
- Competition for school students
- Creation of young leaders for the safety

SINA | The involvement of municipalities and schools

The main goal is to expand our project by involving major cities in the regions served by Autostradafacendo's partner highway dealerships, with the aim of increasing road safety awareness across a wide geographical area.

This important step comes about thanks to the active collaboration of participating municipalities and local schools working in synergy with Autostradafacendo's freeway **Concessionaires** partners and the **State Police**.

NOT TRAINING EVENTS ONLY

SINA | To create young leaders of the road safety

To promote that young people can put themselves out there for road safety

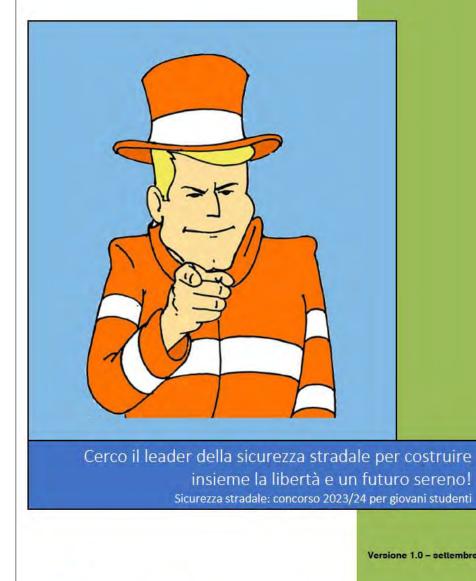

Strategies for a long term engagement on road safety

SINA | Competition for schools

- Partners of the campaign challenged schools to produce their own projects to promote road safety.
- The National Ministry of Education diffused the invitation to the competition schools of Liguria, Lombardia, Valle d'Aosta, Piemonte Emilia Romagna e Toscana
- Four winners (different age)
- Prize: small budget gifted to the classroom and the possibility to visit the traffic control centre for winning boys and young adults
- Awarding commission: Traffic Police, Motorway operators, municipalities

CINTURE

CANTO REALIZZATO DALLE CLASSI 42 E 40

SEUGLA PRIMARIA "ROSSIGNOLI" NIZZA MONFERRATO(AT)

NA,NA...CINTURE
NA,NA... E TI SENTI SICURO
SICURO E VAI
NA,NA...
SE TI METTI A GUIDARE
NON BERE, NON FUMARE,NON MANGIARE
E SUL SEDILE NON TI DIMENTICARE
TU LA CINTURA DEVI SEMPRE ALLACCIARE
E RISPETTARE ANCHE LA VELOCITA'
CHE LA TUA VITA PUO' SALVARE, SI SA...
DEVI RAGIONARE!

NA,NA...
QUANDO GUIDI METTI VIA IL CELLULARE
E' NORMALE EH EH
MA SE
SON BAMBINO
IO MI LEGO DIETRO SUL SEGGIOLINO
DAVANTI NON STO MAI
MAI MAI MAI
DA PEDONE USERO' LA BANCHINA
IN FILA INDIANA
NA,NA...

E SULLE STRISCE TU LO SAI CH'E' NORMALE ANDARE DRITTO MAI IN DIAGONALE MA TU RISPETTA ANCHE LA VELOCITA' CHE LA MIA VITA PUO' SALVARE, SI SA

DEVI RAGIONARE!

di sicurezza si impiegano in media 5 secondi

Scommeteresti la tua vita in cambio di quei pochi secondi?

RIFLETTI

RICORDA:

Indossa sempre la cintura...

il peggio non è rimanere in mutande!

Autoprotezione: essere vigili e rendersi visibili

Su strada, siamo sempre a rischio. Anche se siamo fermi, altri veicoli possono sopraggiungere ad alta velocità. In caso di incidente, l'indice di mortalità per i pedoni è 4,4 volte superiore a quello degli occupanti di autovetture (ISTAT luglio 2023).

Sul margine stradale o addirittura in carreggiata non sono permesse leggerezze. Mettiti in posizione sicura e renditi visibile. Per la tua sicurezza, indossa abiti chiari, il giubbotto riflettente e luci lampeggianti. Questo consiglio è ancora più importante con veicoli ad alta velocità: sulla corsia d'emergenza autostradale, in una piazzola di sosta, nelle strade di scorrimento urbane, ecc.
